

Optimize the support for your mission-critical SAP system with **GETR, Inc.** expertise while minimizing costs

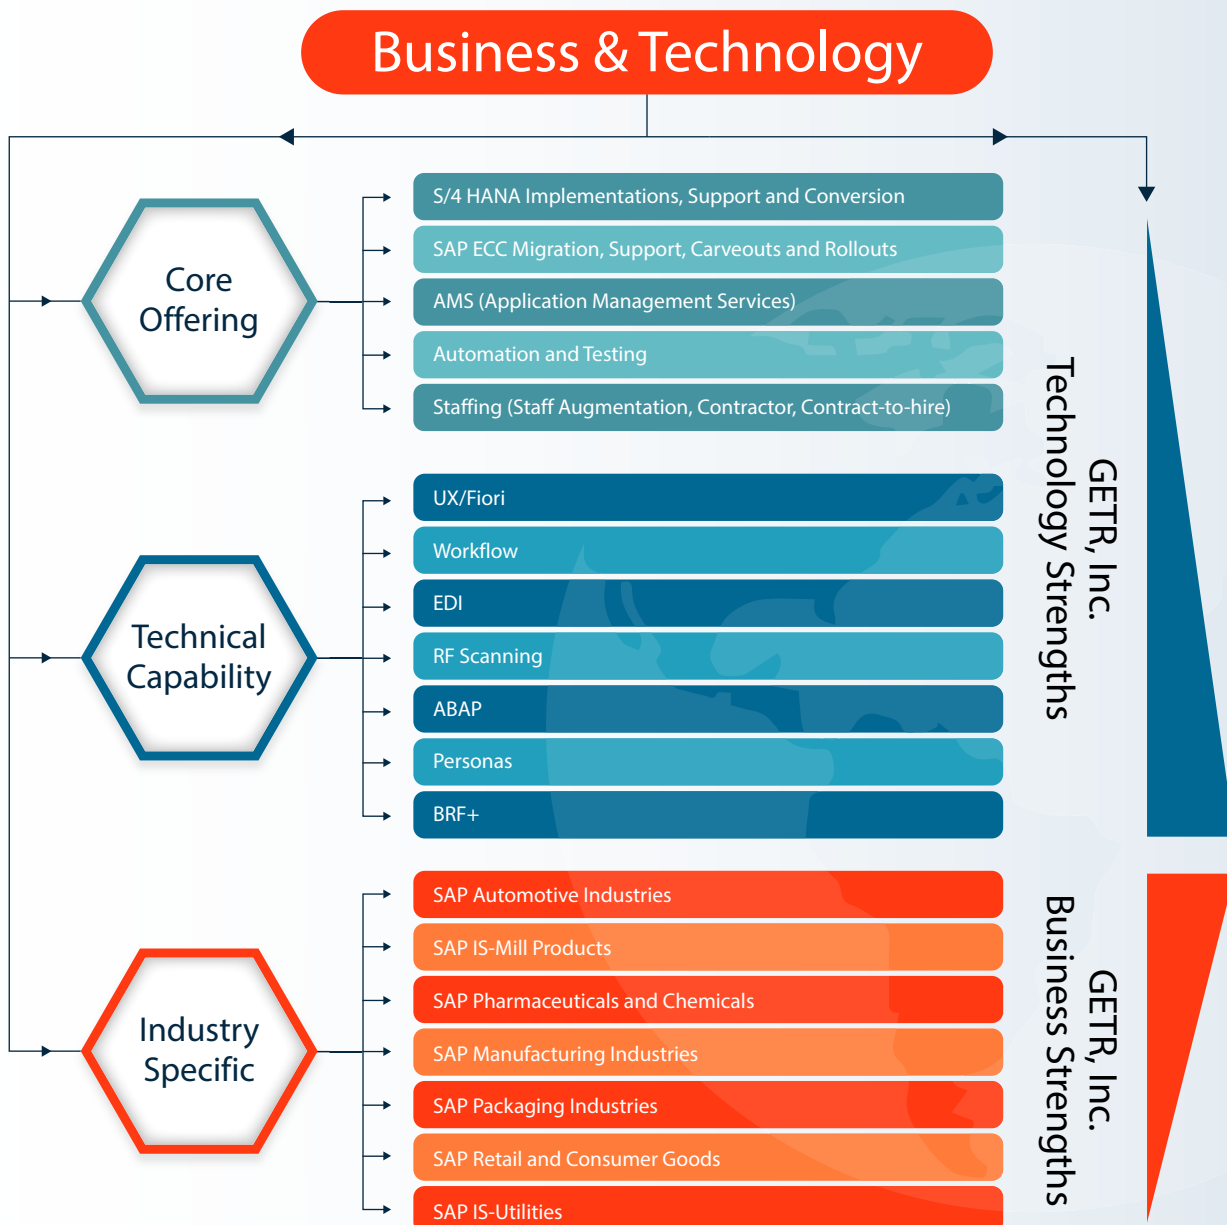

At GETR we come with many years of experience helping businesses leverage the power of SAP. We offer SAP Support Services with a special focus on business best practices and cost effectiveness. Our solutions begin with our many years of industry experience. We then develop a thorough understanding of your business and processes. With our onshore and offshore resources, we offer you the advantage of high-end services at lower costs.

Services and Capabilities

Our consultants come with strong business experience and knowledge of the best business practices to deliver the most efficient and best solutions. Our team covers the entire implementation Life Cycle – Blueprinting, Application Configuration, Data Conversion, Testing and on-going operations. We also offer version upgrade and S/4 HANA Migration services.

With our extensive background in the Automotive, Mill Products, Pharmaceutical, Manufacturing, Chemical, Packaging, Retail & Consumer, and Utilities industries, we design innovative and scalable solutions based on customer expectations and industry best practices.

GETR's technology services are powered by our strong business and technology consulting practices and are classified under three broad categories:

GETR
Functional & Technical Capability

Functional Expertise

With an average of 10 years of experience with SAP in various industries, our functional consultants come with deep business acumen and knowledge of the best business practices to deliver the most efficient and best solutions. Our team is specialized in traditional SAP applications, analytics, new technologies and have expertise in all phases of SAP projects from requirements gathering to implementation and support.

We design innovative and scalable templates based on customer expectations while reducing implementation time. Our solutions deliver operational efficiency, risk reduction, adherence to industry regulations and compliance reporting.

Technical Expertise

Our development team is comprised of technical experts with rich experience in SAP solutions. The team comes armed with in-depth knowledge of advanced development techniques and interface programs to work with legacy and third-party applications

SAP UX/Fiori

We are experienced in developing user friendly eForms using ABAP Webdynpro and UI5 with approval functionality. Our SAP Fiori solutions include implementation of SAP NetWeaver Gateway, SAP UI5, SAP workflow, ABAP and Fiori Apps.

Personas

Personas allows you to personalize SAP screens, automate business processes, and run them on your phone, tablet or desktop. It provides a simple drag and drop approach to modify most SAP GUI screens to improve usability and visual appeal.

ABAP

We deliver solutions that are highly sustainable for future business requirements. GETR SAP experts are equipped with in-depth work experience across many industry domains. We do custom developments that are tailored to client specific business needs and challenges

Workflow

Our workflow team has extensive experience in designing and developing solutions in SD, MM, FI, HR, SRM and Travel & Expenses. We can handle role resolution techniques, deadline monitoring, offline approval process with outlook, mobile and UWL integration.

RF Scanning

Use of barcodes and RF devices has made warehouse operations more efficient. Time needed to perform operations in the warehouse has been reduced because the data can be collected by RF DEVICE without requiring manual collection and manual entry of data.

EDI/DOCS

Our EDI team has technical expertise and business knowledge in developing EDI solutions to enable companies to exchange business documents such as PO, SO and Invoices using SAP EDI technology and integration tools like SAP process integration (PI), Gentran, Mercator, Seeburger etc.

Flexible Support Model For Every Business Need

With our flexible delivery and support models, we offer many options for supporting your SAP system. From full Application Management Services (AMS) to several staff augmentation and project-based options, fixed price or time and materials. Full or Fractional FTE support is available.

Managed Service Contract

We offer full SAP support and maintenance services with experienced staff and a global delivery model with onshore and/or offshore capabilities. GETR Application Management Services can include: Level 1, Level 2, Level 3 and/or Advanced SAP Application Support. These are typically fixed price agreements with fixed price or time and materials add-ons for projects.

Fractional FTEs

You don't have to contract for full support of the SAP system, and you don't have to add staff in whole increments. We'll work together to determine the additional staffing you need to support the system and you can contract for that number of FTEs in any whole or partial increment.

Retainer Model

With the Retainer Model you contract for a base level of support hours at a discounted rate. With a retainer in place, you are assured of fast response times and additional resources are available if needed at agreed upon rates.

On-Demand Services

On-Demand services are well suited for project work and forecasted demand peaks. Subject to agreed ramp-up times, resources are available at agreed rates. On-Demand Services are ideal for Development Projects, Implementations, Support, Rollouts, Carveouts, and Upgrades.

Staffing Solutions

GETR can staff SAP Professional, Technical and Managerial talent, short or long-term from our deep pool of talent. Our placements cover local, national and global needs with highly specialized and difficult to find professional and management positions at the mid to senior-level.

Our flexible support models can be used with any of our services and the different support models can be combined in many ways to give you just the right level of support as well as provisions to handle peaks in demand and projects. From a full service based AMS Contract to Staff Augmentation, GETR can support your system or add the appropriate resources and skill sets to your team. Along with traditional staffing and consulting solutions, we make it easy for you to manage and our blended onshore and offshore rates make it easy on your budget.

Some of our Customers AND WHAT THEY'RE SAYING

"The GETR team was patient and explained things multiple times if necessary. They provided good insight into process improvements and dove into incidents to drive to root cause and not just put a band aid on the issue."

Business Systems Director, Automotive Supplier

"GETR proactively partners with its clients. As a Tier 1 Automotive Supplier, we are always looking for ways to improve our SAP system and leverage the broad capability of SAP. GETR applies their expertise and knowledge in value stream mapping of our core business processes and helps us develop a roadmap toward more robust and value-added business processes."

IT Director, Automotive Supplier

"Each person on the GETR team demonstrated a deep understanding of SAP within their respective areas of expertise, giving us confidence in their solutions ... GETR partners with us a part of the team and are integral to the successful execution of our foundational business processes."

IT Director, Manufacturing Client
